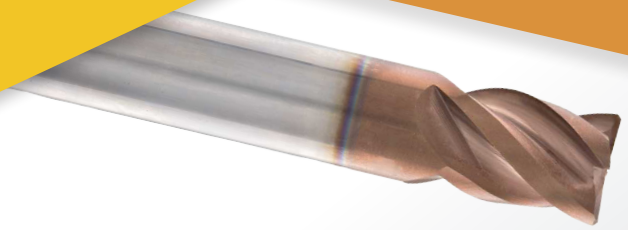
New Solid Carbide Endmill

High Performance

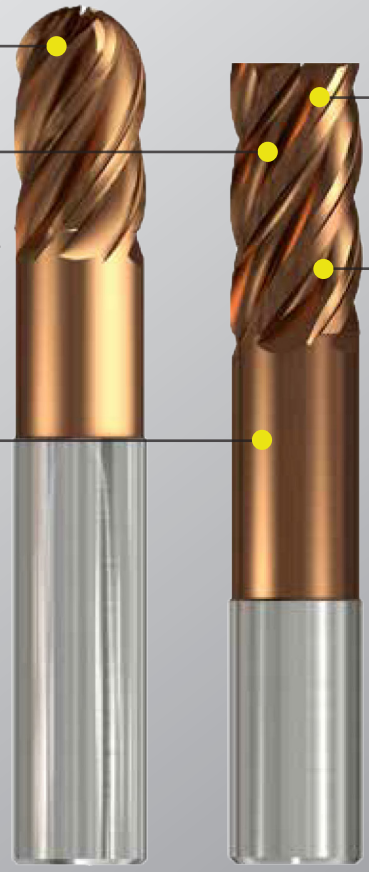


Try 1/2 x 1 x 3 selling at $ 40 each!

Iscar's New Solid Carbide Endmills are designed with variable flutes for chatter dampening and are PVD coated with oxidation resistance for prolonged tool life.

Complete Range and All Sizes available!!

Extra Special Pricing!!



Square or Ball Type

VF Form

Variable pitch with 38° continuous helix to mitigate vibration, improving performance. Ideal for HEM (trochoidal) operations.

Extended Reach

Many relieved neck options for deep shouldering and pocketing applications.

Corner Radius

Available in a wide range of popular radii.

V910 Coating

TiAlCN PVD nanolayered structure provides excellent wear resistance and is ideal for HEM (trochoidal) operations in hardened steel (up to 60 HRc). Also excellent for low and high alloyed steels with or without coolant.
